Spam/Virus Filtering Protects Law School E-mail Accounts

ICT is pleased to announce that Texas Wesleyan University Law School email users now benefit from new spam-filtering and virus-filtering software. This technology was added to the email server to filter the barrage of virus-infected, spying-enabled, and unsolicited or unwanted bulk email messages that show up in university email inboxes everyday.

All employees with an email address ending in "@law.txwes.edu" now have this protection.

For further questions or assistance with spam/virus filtering, please contact the ICT Help Desk via e-mail at helpdesk@txwes.edu or by phone at 817-531-4428.
